

Computer Deconstruction Laboratory

Learn to Program Projects:

Pick one of these projects to learn to program. Then go to the manual page where the project is described.

We have already downloaded all the projects so you will just have to open the correct one from the Arduino IDE.

- | | |
|--|---------|
| 1. Red Lights (Electronics only, no programming) | Page 9 |
| 2. Lights (Electronics only, no programming) | Page 11 |

Read Page 13 before you start any of the following projects

- | | |
|-------------------------------------|---------|
| 3. Blinking_Light | Page 14 |
| 4. Alternating_Lights | Page 17 |
| 5. Stoplight | Page 18 |
| 6. Button | Page 19 |
| 7. Bicolor_Light | Page 20 |
| 8. Night_Light | Page 21 |
| 9. Blink_Rate | Page 21 |
| 10. Copy_Cat_Light | Page 21 |
| 11. Light_Monitor | Page 22 |
| 12. Distance_Sensor | Page 23 |
| 13. Photo_Stop | Page 23 |
| 14. Button_Stoplight | Page 24 |
| 15. Snapino_Test (for testing only) | Page 25 |
| 16. Varying_LED_Brightness | Page 26 |
| 17. Light_Controlled_LED | Page 27 |

18. LED_Brightness_Button	Page 28
19. Sloppy_Switches	Page 29
20. Click_Counter	Page 30

How to find the manual for your own copy:

https://www.elenco.com/wp-content/uploads/2017/01/SCSNAPINO_Manual.pdf

If you want to build you own Arduino board you can find the 3D printing file here

https://github.com/Computer-Deconstruction-Lab/CDL_learn_to_program/tree/main/Arduino_snap_circuits_compatible_board

The sketches can be found at:

https://github.com/Computer-Deconstruction-Lab/CDL_learn_to_program/tree/main/Example_Sketches
